

How to Network & Utilize LinkedIn

TREY SUTJITA

(she/her/hers)

Program Manager, Advanced Degree Career Education

Trey received her PhD in Microbiology from UT Austin resulting in a highly diverse skill set ranging from molecular biology wet lab techniques to entrepreneurial product development and management. She gained extensive experience in addressing the needs and concerns of graduate students and developing programs and initiatives to improve graduate student life while serving as President of the Interdisciplinary Life Science Graduate Program Graduate Student Assembly. Her current position as Program Manager of Advanced Degree Career Education with Texas Career Engagement enables her to utilize the technical skills she obtained as a scientist and the soft skills she developed as a leader to help advanced degree students plan and achieve their career goals.
